Rural Operations

This immersive three-day course is designed to prepare tactical operations teams for missions in remote, wooded, or rural environments, with an emphasis on coordination across both small-unit and large-scale operations. The curriculum covers the full operational cycle — from mission planning to execution — with content tailored to both operators and team leaders.

Training is delivered through a structured blend of classroom instruction, hands-on field training, and scenario-based exercises. The course culminates in practical evolutions set in realistic, mission-driven environments with force-on-force engagements utilizing simmunition weapon systems.

Topics include the following:

- Mission Planning and Team Coordination
- Practical knowledge of Gear Selection and Usage for the Environment
- Land Navigation and Terrain Familiarization
- Movement Techniques & Small to Large Unit Tactics
- Field Communications and Signal Plans
- Integration with K9 & Aerial Coordination
- Casualty Care and Medical Evacuation
